

## > Bring your life

Whether it's exploring spectacular nature in the great outdoors or travelling the world with family and friends, we all have a passion for enjoying an active life.

At Thule, we share your desire to spend more time enjoying our passions - which means less time worrying about how to bring all the stuff we need. In this catalogue, we've collected all our recreational vehicle accessories, especially for your motorhome or caravan. But that's just a small part of everything that's Thule. Thule is also a part of Thule Group, a collection of international brands that have one common mission: develop smart ways to simplify your active life.

Wherever your passion takes you, whatever you're bringing. With Thule products, you're free to live your active life to the full.

## > Awnings

Thule awnings are designed to provide shade on sunny days and to serve as a shelter on rainy days. We offer a wide range of awnings with unique features in order to fit any vehicle type.

## A solution for every vehicle

Travelling with your recreational vehicle means freedom: you can go wherever you want, whenever you want. Make a stop at the most wonderful places and enjoy outdoor life. A Thule awning is the perfect way to have a sheltered space next to your vehicle and it also provides shade and protection against the weather elements. You can easily mount awning accessories for different purposes in just a few simple steps! Thule offers awnings in 3 different categories to perfectly fit your vehicle and personal needs.

### Wall-mounted Awnings

- Most common installation on the vehicle wall
- Large range of adapters available, developed together with and approved by RV manufacturers, to fit any vehicle type
- Easy mounting in the awning rail of a caravan

### **Roof-mounted Awnings**

- Installation on top of the RV
- Selection of adapters for specific manufacturer's models available
- Perfectly integrated on the current RV design
- Alternative in case of lack of space or width restrictions

### Rail-mounted Awnings

- Easy installation, no brackets needed: fits into the caravan rail
- Not permanent: you can still switch between awning and canopy
- Very light compared to the wall and roof awnings

### Why choose a Thule awning?

#### Ease of use

Manual awnings have a telescopic hand crank for opening and motorised awnings have a remote control or a switch for effortless opening. Thanks to the Thule Quick Release system, the support legs can be released on demand to prevent them from falling during the set-up. All support legs are dropped vertically to reduce the risk of damaging your vehicle. Easily adjust the legs to the right heights with the user-friendly Thule Quick Lock system.

### Wide range of accessories

Thule offers different accessories to extend your awning to suit your lifestyle. For example the Thule Smart Panels are the perfect solution if you want to create privacy and in the meantime be protected from weather elements such as sun, rain and wind. Add more outdoor living space by using a Thule awning tent.

#### Appealing design

Thule Omnistor awnings have a timeless design that perfectly matches any vehicle type. Depending on your awning type, you have the choice between following cassette finishes: anodised, white, anthracite or cream.

### Preferred awning brand

Thule is the elected best brand in awnings for years. Thule has a large range of installation brackets and adapters available, developed together with and approved by the recreational vehicles manufacturers.

#### Superior product stability

Thule Omnistor awnings are equipped with sturdy tension arms in combination with an innovative support of the roller tube to create a perfectly tensioned awning fabric. They also increase resistance to wind for safer usage. Depending on the awning type, lengths from 3.75 m and more are supplied as standard with an integrated tensioning system or with an extra tension rafter to keep the fabric even tighter. All our awnings are tested in various weather conditions for optimal

# MARKEN 2022

A leading brand in awnings for years

### **Awning finishes**

#### **Cassette finishes**

All Thule Omnistor awnings are made of sturdy aluminium profiles that guarantee long lasting safety and reliability. Thule awnings are tested under the toughest conditions to ensure they surpass current standards.

Anthracite

NOTE - Cassette finishes Anthracite and Cream are only available with fabric finish Mystic Grey (31). Please refer to each awning type to find out the possible cassette and fabric finishes

#### **Fabric finishes**

The top quality PVC fabric is printed on both sides and has a coating to keep the fabric colour fixed, watertight, washable and durable. Depending on your awning type, you can choose different patterns for your awning fabric.

31 - Mystic Grey

22 - Uni White

NOTE - Uni White (22) is available on request with a longer delivery time

32 - Sapphire Blue

#### **FABRIC UV PROTECTION**

The coating not only ensures a high degree of scratch and fade-resistance, but also increases UV and heat-resistance.

### Long lasting reliability

Top quality PVC fabric composed of 5 layers to ensure the awning is watertight, washable, durable and resistant to scratches.

- 1 PVC top coat: ensures colour protection and scratch resistance
- 2 Vinyl with printed pattern
- 3 Strong layer in polyester scrim

### **Roof-mounted Awnings Thule Omnistor 9200**

### The perfect roof awning for extra large vehicles with a projection of 3 meters

The Thule Omnistor 9200 awning has been designed to perfectly integrate with any vehicle design. The awning is available in 5 lengths from 4.00 m to 6.00 m and is especially convenient for large vehicles. The awning is equipped with an anti-rattling device to enjoy a smoother ride.

#### Operated manually or with a motor

The optional 230 VAC EM motor with remote control allows you to operate the awning without any effort. The motor settings ensure a perfect closing of the front profile. A safety device has been created to operate the awning in case of electricity failure. The motor can easily be installed retrofit as an accessory on a manual Thule Omnistor 9200 awning (+2 kg).

#### Perfect fabric tension

Thanks to Thule's unique integrated tension rafter in the spring arm, the fabric is always well tensioned. The spring arm, reinforced with a double steel cable, automatically deploys the tension rafter to ensure the awning stays stable and resistant to wind.

MORE PRODUCT

### **Wall-mounted Awnings Thule 4200**

### The best wall-mounted awning for motorhomes and caravans

The Thule 4200 awning for motorhomes and caravans is the lightest box awning in the market. It's available in lengths from 2.60 m to 4.50 m with a projection of 2.00 to 2.50 m.

#### Stability

For extra stability, Thule 4200 awnings with a length of 4.00 m or 4.50 m have a high-quality and easy-to-apply aluminium Thule Tension Rafter G2 supplied as standard.

#### Quality

The spring arms and support legs of the awning are secured inside the awning, to avoid rattling noises while driving.

#### Ease of use

A telescopic hand crank ensures an easy opening and closing of the awning. Thanks to an especially designed and easy to apply sealing rubber with integrated drainage system, the gap between the vehicle and the awning is perfectly sealed and the rain water is evacuated automatically.

### Design

Sleek design to obtain the best integration on the vehicle through a new end cap shape

### **Awnings - Accessories**

### Wind protection

### Thule Fabric Clamps

309698 - These clamps provide a more secure fastening between the awning fabric and the tension rafter or blocker rafter to prevent the unpleasant noise of a flapping awning fabric due to wind. The clamps have an universal fitting on most rafter profiles, just click it on the rafter, put the fabric in between and tighten with the handle.

- Oval side blocker rafter
- Thule Tension Rafter G2
- Square telescopic tension rafter TO 1200

NOTE - A set contains 2 clamps. You can use up to 2 clamps on one side of the awning

#### Thule Tension Rafter G2

An additional rafter ensures an optimal tensioned awning fabric for a better wind resistance. The rafter is made from durable anodised aluminium profiles in combination with high impact plastics. No heavy manpower is needed for the installation.

### Easy installation in only 3 steps

- 1 Open your awning.
- 2 Place the rafter into the awning. This is effortless thanks to the smooth integrated spring.
- 3 Slightly roll-up the awning fabric until the rafter is blocked. Perfect tension is reached when the two black parts touch each other.

## > Tents

A tent gives you the perfect outdoor living space. The highly versatile range of Thule awning tents offers an option to suit every desire.

### Why choose a Thule Tent?

### **Easy installation**

#### Transform your awning into a complete tent

The awning becomes your roof when you add the side panels by means of an aluminium rafter. Attach the mast profile to ensure the perfect sealing to your vehicle. Easily slide the front panels in the lead rail and connect all panels.

### Short stay: Thule QuickFit

This tent exists of 1 piece and takes only 15 minutes to set up. Slide it in the caravan rail or in an additional rail below your awning cassette and fix it to the awning lead rail. In this way you create a double roof which offers a good insulation to keep the tent and vehicle cool. Side windows are provided with mosquito mesh.

### Stability and security

Depending on the awning tent type, Thule uses different durable high quality fabric materials: Airtex®, PVC or Ripstop that provide wind and water tightness. Moreover all Thule awning tents are tested in various weather conditions to guarantee optimal stability and security.

### Innovative design

Thule awning tents have a contemporary design in line with the awning design. Thanks to the combination of neutral colours: black, white, grey and silver, they suit all awning fabric colours. Large windows invite maximum light and create an extra feeling of spaciousness. Permanent ventilation openings reduce condensation.

### Modularity

Thanks to the clever design, the awning tents can be installed completely but most of the panels are unzippable and removable to create door openings on different sides.

#### Thule Veduta

- The front panel is easy to install as one complete piece with two or three window
- The 4 window panels are unzippable
- One panel has two integrated door openings and can be placed anywhere you want

#### Thule Panorama

· You can fully remove the large front and side windows or open them vertically to use as a door, or horizontally to let the fresh air in

#### Thule Residence G3

- The window panels can be rolled upwards
- Front panels starting from 3.50 m length have a door opening on both sides and can also be rolled up separately for easy entrance
- It is possible to add accessories in the optional rail at the front panel

#### Thule QuickFit

- All sides are fully zippable
- They can be taken away to create an open porch, can be opened sideways to create a door on all sides, left or right and can be opened from top to bottom to create an open window

### **Tents**

### Thule Veduta

### Awning tent especially designed for caravans

The Thule Veduta awning tent is available in four lengths and can only be used in combination with a Thule Omnistor 6300 | 6200 roof awning mounted on a caravan.

#### Installation

The awning tent is delivered with claming profiles to mount the side panels and connect them with the awning fabric for a perfect roof sealing. The side panels slide into the claming profiles and the front panel slides into the awning lead rail. Both panels are combined with a zipper for optimal closing. The sloping front panel offers a large internal living surface and creates an extra feeling of spaciousness.

#### Fabric material

AIRTEX® is perfect for solar protection applications. This light fabric is 100% polyester fabric, which is coated with acrylate on one side and impregnated. The special coating gives AIRTEX® a distinctively textile character.

### MORE PRODUCT INFO

### **Tents** Thule QuickFit

### Universal fitting on awnings with a projection from 2.50 m

The Thule QuickFit awning tent is available in 3 standard lengths, suitable for different mounting heights.

#### Installation

The tent is in one piece and doesn't need additional fixation profiles. It easily slides into the caravan rail or into an additional rail below the awning cassette, and is fixed to the awning lead rail. The front canopy is installed with flexible arch tubes to provide additional shade.

#### Fabric material

Made out of Ripstop fabric: a lightweight woven and tear-resistant material used for aeronautical engineering. This material also has a strong water resistant coefficient. Because the tent is connected with an awning, the double roof offers a good insulation to keep the tent and vehicle cool.

### Add to your Thule QuickFit

## > Bike Racks

No matter which vehicle you have and regardless the type and number of bikes you want to take along, there is a Thule bike rack that perfectly matches your needs and that will exceed your expectations.

### Why choose a Thule Bike Rack?

### THULE TEST CENTER™

### Quality you can rely on

If you visit Thule Test Center™, you might get the idea that we don't like our products. You'd see the look of satisfaction on the engineer who straps twice the recommended maximum weight onto a towbar-mounted bike carrier and pushes the button to simulate it going twice around the world. Or the cheerful smile of the technician who enjoys testing roof racks with extreme heat, cold, UV-radiation, damp and, just for good measure, some pretty nasty chemicals.

#### **Smart innovations**

Each Thule bike rack has smart innovative features making them easy to use and simple to install: wheel holders with pump buckle tensioning system, ergonomic Tilt-Lock system, sliding rails, fast click connections, ...

#### Bike holders

Soft touch bike holders with integrated or optional locks.

#### Pump buckle tensioning system

Easy, secured fastening of the bike wheels.

#### Sliding rai

Sliding rails make it easier to find the best position for your bikes.

#### Platform lock system

Lockable platform to avoid movement during transport.

#### Tilt-Lock system

Easy to lock the tiltable platform onto the base frame.

#### Fast click connections

Fast click connections make the installation easier and faster.

#### Load advice

- Load the heaviest bike first and closest to the vehicle
- The lightest bike should be fixed outwards
- Set the bikes crosswise on the carrier to find the best position, rotate the steering wheel 90° if needed
- Always secure all bikes to the bike rack frame using the included safety strap

Bike Racks Black Edition

# Designed for outdoor adventures

Add some attitude to your recreational vehicle with the Thule bike rack range in black. The black aluminum frame is paired with black bike holders, creating a bike rack with a design language of its own - and features that will take your bikes anywhere. Made for people who want to have a bike rack with a sporty look.

### **Rear Wall-mounted Bike Racks** Thule Lift V16

### Bike rack with a height-adjustable platform

This bike rack is attached to the rear wall of a motorhome or caravan and is suitable for the transport of two (electric) bikes thanks to its load capacity up to 50 kg.

#### Easy load and unload

The platform of the bike rack can be lowered by means of a crank, which makes it easier to load and unload the bikes. Choose the motorised version for more ease of use. The 12V motor lowers the platform in just 40 seconds.

#### Safe and stable

Loading and securing the bikes takes no effort thanks to the lowered platform. The adjustable wheel holders keep your bikes in position and are easy to tighten with the straps with pump buckle tensioning system so that the bike wheels are securely fastened. The bike holders are attached to the bike frames and are lockable to prevent theft. You can transport a third bike by adding the optional rail kit.

### Add to your Thule Lift V16

Thule Lift V16 3rd Rail Kit 307370 - To position a 3<sup>rd</sup> bike on the bike rack.

Thule Lift V16 Elongation Kit 307371 - Makes it possible to extend the mounting range to 95-150 cm.

### Elegant bike rack with a large load capacity

**Rear Wall-mounted Bike Racks** 

**Thule Excellent** 

This bike rack is attached to the rear wall of a motorhome or caravan and is available in two models: a standard and short version. Both carriers are perfectly suitable for both regular bikes, mountain bikes and e-bikes thanks to their load capacity up to 60 kg.

#### For each bike

The wide rails are slidable both in depth and from left to right to find the best position for your bikes. The adjustable wheel holders keep your bikes in position and are easy to tighten with the straps with pump buckle tensioning system to firmly secure the bike wheels. The bike holders are attached to the bike frames and are lockable to prevent theft. You can transport a third or fourth bike by adding the corresponding optional rail kits.

#### Finish in black

The standard model is now available completely in black for a sleek and modern look and is extendable with a third and fourth bike with the optional rail kits.

### Add to your Thule Excellent

#### Thule Excellent 3rd Rail Kit To position a 3<sup>rd</sup> bike on the bike rack. Adjustable in all directions.

This bike rack is attached to the rear wall of a motorhome or caravan and is available in two models: a standard and short version. Both carriers can transport up to 4 bikes with a load capacity up to 60 kg.

#### Load of the bike

Thanks to the sliding rails you can easily find the best position for your bikes. The bike wheels are securely fixed with straps to avoid movement during transport. The bike holders are attached to the bike frames and are optionally lockable to avoid theft. You can take a third or fourth bike with you by adding the optional rail kits.

### Add to your Thule Elite G2

#### Thule Elite G2 3rd Rail Kit

306565 - To position a 3<sup>rd</sup> bike on the bike rack. Adjustable from left to right.

#### Thule Elite G2 4th Rail Kit

309824 - To position a 4<sup>th</sup> bike on the bike rack. Fixed outwards and is not adjustable.

See more accessories p.87 to 91

## **Rear Wall-mounted Bike Racks**

Lockable platform - The platform lock creates excellent dynamic force control and perfectly secures the bikes during transport. The platform is locked manually and can easily be clicked in the upwards position when not in use.

# Garage-mounted Bike Racks Thule VeloSlide

# The smartest and most user-friendly bike rack for your RV garage space

With Thule VeloSlide, you get an ideal rack for transporting up to two e-bikes on your travels, using your RV's garage space to store them securely and protect them from the weather.

### Loading and unloading couldn't be easier

When loading, the bike rack slides out up to 1.5 meter so you can lift your bike from the outside without having to bend awkwardly into the garage space. Thanks to the unique, patented and easy-to-grip handle, you can slide the rack into the garage space and automatically lock it securely - all with just one hand. When attaching your bikes to the rack you can easily optimise the position of each bike, both horizontally and vertically, with simple intuitive handlings even while the bike is on the rack and with no need for tools.

### High-quality design

Thanks to the high-quality design and materials, you can be sure of safe, secure transportation of your valuable e-bikes, not to mention comfortable loading and unloading of heavy bikes - even when the bike rack is fully extendend by 1.5 meter.

### Add to your Thule VeloSlide - For small garages

Reduce your bike's height by replacing the front wheel by one of our adapter kits and gain the needed space. The type of kit depends on your front wheel axle.

### Thule Forkmount Adapter kit

### Quick Release

302053 - Adapter kit that replaces the Quick Release front wheel with a new axle hub. The torque limiter ensures a tight but protective grip of the front fork.

See p.86

### Thru Axle

302054 - Adapter kit that replaces the front wheel while re-using the existing thru-axle of your bike. Adaptable to different axle sizes to ensure the correct fit.

### **Garage-mounted Bike Racks** Thule VeloSlide Position bike - Bike's ideal position can be optimised without tools - even Bike holders - Adjustable soft-touch while the bike is already bike holders can easily be repositioned attached to the rack. to align with the bike frame. One-handed control Unique and patented one-handed control Convenient handling -The bike rack slides out up to 1.5 meter. Comfortable handling of the bikes, all done while standig outside. Mounting rails - The rack takes little space when not Thule VeloSlide Short in use, it can be slid to the Overall length is 1.80 m; 15 cm shorter than the regular Thule VeloSlide. side or removed completely only leaving the mounting The bike rack slides out up to 1.35 m. rails on the garage floor. **ALL TECHNICAL SPECIFICATIONS** - See p.126

## **A-frame-mounted Bike Racks** Thule Caravan Superb XT Black

### Design and functionality for an A-frame-mounted bike rack

This A-frame-mounted bike rack attracts the attention by its unique design in black and offers all the funcitonalities to transport your bikes in a simple and safe way. Available in a standard and short version. Both carriers are suitable for the transport of heavier bikes thanks to their load capacity of up to 60 kg.

### Load of the bike

The adjustable wheel holders keep your bikes in position and are easy to tighten with the wheel straps with pump buckle tensioning system to securely fasten the bike wheels. The bike holders are attached to the bike frames and are lockable to prevent theft. You can take a third bike on the standard version by adding the optional rail kit.

### Access to the front locker

Thanks to the unique Tilt-Stop system the bike rack is tiltable even with loaded bikes. The maximum angle to tilt the bike rack can be set as you please. In this way the front locker of the caravan remains accessible.

### Add to your Thule Caravan Superb XT Black

FEATURES

# > Comfort & Security

Make your holiday pleasant and comfortable. With a wide range of steps and ladders, access to your vehicle or roof is effortless. Enjoy your activities far from your vehicle with the knowledge your belongings are protected with robust, high quality locks.

## Comfort Thule Steps

### Easy access to your vehicle

A step allows you to easily enter your vehicle without effort, operated manually or via motor.

### **High quality**

Extremely robust, the steps are made of corrugated anodised aluminium. Their quality exceeds European quality standard EN1646.

### Extra safety

A switch is included as standard for the connection inside the vehicle. Install the relay or control box, making it impossible to drive away with the step still out.

### **Motorised steps**

For even greater convenience, opt for the motorised steps. Each model is operated by a simple switch conform to the EMV and CE norms.

### LED: maximum visibility

To be clearly visible under all conditions, each motorised slide-out step can be equipped with the optional Thule LED Kit for additional lighting.

### The stable way to park

### Top stability

Thule levelers offer a very large surface area for increased stability, making them ideal for wider tyres, with a maximum load capacity of 5 ton/set.

### Striped area

The three heights make it easier to get your vehicle leveled. The striped area offers perfect grip between the tyre and the leveler.

# MORE PRODUCT

### **FEATURES**

- 3 heights: 44 78 112 mm
- Dimensions LxWxH: 560 x 200 x 150 mm
- Weight: 1.8 kg per leveler

# Locks

# Thule Security Handrail

### Thule Security Handrail

This handrail has a unique double locking design for extra safety. In the open position it offers a sturdy grap handle to help getting in and out the vehicle and in its locked position it folds across the door giving added visible security.

### PACK

308892 - 1 piece

308893 - Thule Security Handrail Door Frame Kit

- See p.128

### Thule Security Handrail - Short Version

This sturdy and easy-to-fit handrail is ideal for a motorhome or caravan with a lower entry door. In the open position it offers a sturdy grap handle to help getting in and out the vehicle and in its locked position it folds across the door giving added visible security.

### PACK

307387 - 1 piece

308893 - Thule Security Handrail Door Frame Kit

## Locks Thule Universal Lock

### 3 different mounting options with the same lock

This high security lock fits all: motorhome, caravan. Possible to mount the same lock in three different ways. The surface-mounted installation is perfect for sliding doors, cabin doors. The wall-mounted and the door frame-mounted installations are perfect for the entrance door, the garage door or the hatches of a motorhome or caravan.

### **FEATURES**

- Large overlap with door for high security
- Strong rotating lock system
- The door frame bracket only requires a 3 mm gap between door and frame
- Fits left or right opening doors
- Available in the colours white and black

**ALL TECHNICAL SPECIFICATIONS** - See p.128

301406 - 1 piece

301407 - 3 pieces White

# Thule Inside-Out Lock G2

### Secures the entrance door both from the inside and outside

High security lock for motorhome and caravan. This lock is mounted through the wall of your vehicle and secures the entrance door from the inside and outside. It's lockable from both sides but for your safety it can always be opened from the inside without a key.

### **FEATURES**

- Limited space required for installation
- Large overlap with door for high security
- · Can be installed horizontally or vertically
- Max. wall thickness: 45 mm

### PACK

307339 - 1 piece White

MORE PRODUCT

Thule Inside-Out Lock G2

### Locks

### Thule Door Lock

This quality door lock is easy to use: just slide it sideways to lock and secure your doors. Mounted through the wall with a mounting plate, a sealing cover and bolts.

### PACK

- 308888 1 piece White
- 308890 3 pieces White

Thule Door Frame Lock

This variant of the Thule Door Lock enables installation when there is no space inside the vehicle to fit the mounting plate. Instead of through the wall, it is screwed into the door frame.

### PACK

Thule Door Lock

- 308889 1 piece White
- 308891 3 pieces White

### Thule Cab Lock

This lock secures your cabin door from the inside with a key. It offers a soft touch cover and matches the colour of your interior.

### PACK

Thule Door Frame

- 309830 2 pieces Grey
- 309831 2 pieces Grey
