Awning Tents - General Instructions

BEFORE THE INSTALLATION

- The installation instructions are delivered with the tent. Please read them carefully.
You can also have a look at our installation videos on www.thule.com
- Make sure all parts are included and check if the delivered tent matches the type, length and mounting height of your awning
- Make sure the vehicle is levelled
- Check if the connections to the vehicle are sufficiently clean. Sand, dust or dirt could cause damage to your vehicle. If you stay for a long period, clean the tent a few times. Apply foil on the vehicle to prevent the connections from scratching the wall
- Check if the channels are clean
- When attaching the positioning pieces in the main housing of the awning, respect the following rules:
 - The surface has to be dry and clean: no dust, no grease !
 - Press well ! Please wait 72 hours before usage !
- To avoid stains, check if there are no trees above the tent that can deposit resin

INSTALLATION

- Open the awning maximum 1 meter before lowering the support legs
- For an easy setup, install the awning tent with 2 people
- Before installing the pegs and pins, close all zippers
- When using pegs and pins, always use a 45° angle when inserting into the ground (see drawing)
- Use pegs and pins depending on the type of soil
- Hammer the peg into the ground before attaching the elastic in order to avoid damaging the elastic

STORAGE

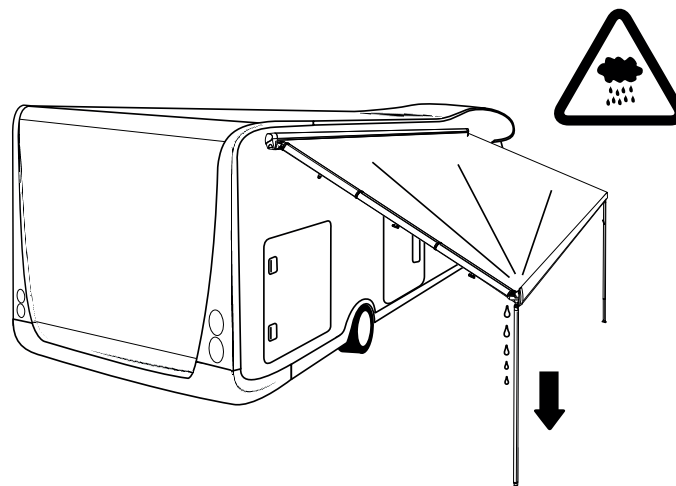

- Make sure not to drag the tent over the ground
- Ensure that there are no hard objects on the windows of the tent during folding, to prevent impressions on them
- Make sure the tent is clean and dry, when being stored for a longer period
- Minimize folding the windows when storing

Awning Tents - Maintenance

- Clean the tent and let dry thoroughly before storage
- Use only water or a dry brush to clean the tent
- Use the Thule PVC Cleaner to clean the PVC fabric of the tent
- Condensation inside the tent is normal. Ventilate the tent adequately

Awning Tents - Important Safety Instructions

- In case of rain, put one awning support leg lower so the water can easily drain off
- When wind reaches 6 Bft. store the tent and close the awning
- Don't place heat sources near the walls or the roof
- Avoid covering the refrigerator grill with the tent
- Use a tension rafter on the awning before tightening the tent completely
- Use a strap kit on the awning after tightening the tent completely

Thule Panorama

INFO

- Length (B) 3.00 m - 6.00 m
- Mounting height (A) 2.30 m - 2.74 m
- Colour Black, silver, white and transparent screen

 - for Thule Omnistor 6300 (3.25 m) on an Eriba Touring
- Net weight:
 - 3.00 m Medium: 27 kg
 - 6.00 m X-Large: 33.5 kg

A = distance between bottom of awning's cassette and ground
B = tent length

FEATURES

- Awning tent with a high quality canopy in a timeless design:
 - High quality welded PVC fabric for optimal wind- and watertightness
 - Side panels are equipped with mosquito mesh which can be closed with external transparent blinds
- Easy and user-friendly installation:
 - The side panels are mounted with clamping profiles and the front panel slides into the awning's lead rail
 - Large windows bring in a maximum of light and create a feeling of spaciousness
 - Front panels starting from 3.50 m length have a door opening on both sides and can also be rolled up
 - Front panel can be rolled up completely. The windows in the front cannot be opened
 - Integrated rope attached to the upper side of the front panel to add additional accessories (for example to use a Thule Sun Blocker G2 Front panel)
 - Permanent aeration on both sides
 - Windslip: prevents the wind from entering through the gap below the vehicle
- High sturdiness and extremely high stability:
 - Clamping profiles to mount the side panels and connect them with the awning fabric for perfect roof sealing
 - Optimal closing due to double-shaped profiles (C-profiles) connecting the front and side panels of the tent
 - A double rubber flap attached to the mast profile ensures full sealing with the vehicle wall
 - A diagonal support between the mast and clamping profile provides extra sturdiness
- NOTE: Front and side panels need to be ordered separately
- Content:
 - Side panels: left and right side + mounting profiles + connection pieces to the awning + 2 luxury bags made from polyester fabric to store the mounting profiles, the tent, pegs, pins and elastics, ...
 - Front panel: the complete front panel + pegs and pins + connection profiles (double C-profiles) + windslip + manual

- Not for vehicles with curved walls
- Special model for Thule Omnistor 6300/6200 on a Ducato H2 (also < 2007) all lengths:
3.25 m - 3.50 m - 3.75 m - 4.00 m
- Net weight:
- 2.60 m Medium: 15.7 kg
- 3.60 m X-Large: 18.4 kg

A = Distance between tent rail and the ground
B = Tent length
C = Tent projection

FEATURES

- Awning tent with a high quality canopy:
 - Lightweight tent fabric: strong Ripstop polyester, polyurethane coated (5000 mm) for rain protection
 - One colour combination fits the various Thule awning fabric finishes
- Fast and easy setup (see Tent Accessories - Installation Kits):
 - Tent is in one piece and doesn't need additional fixation profiles
 - Fits caravans with a roof-mounted awning: tent slides in the original caravan rail
 - Fits a Ducato H2 van, only with a TO 6300/6200 awning: special model in combination with the optional rail: Thule Awning Fixation Kit TO 6300/6200/9200 - 307050
 - Fits motorhomes with a TO 6300/6200/9200 roof-mounted awning in combination with the optional Thule Awning Fixation Kit TO 6300/6200/9200 - 307050
 - On RV's with all wall-mounted awnings in an optional rail: Thule Universal Tent Fixation Kit - 307205/307206, or for Thule Omnistor 5200 with the Thule Tent LED Mounting Rail TO 5200

- Modularity:
 - Front panel with integrated left and right door opening
 - All panels can be completely removed
 - Large windows
 - Integrated curtains which can be closed with a zipper
 - Side windows are equipped with mosquito mesh and can be closed with a transparent window
 - Double ceiling created by suspending the tent below the awning fabric ensures a better ventilation and insulation
 - Two permanent ventilation openings allow a perfect air circulation when the tent is closed
 - Hook at the centre of the roof to attach a lamp or other accessories - can only be used with a rafter
 - The front canopy is installed with flexible arch tubes to provide additional shade
- Content:
 - Complete tent with tent poles for the canopy + windslip and wheelcover + connection pieces to the awning + pegs, pins and elastics + manual
 - Storage bag: 35 x 35 x 70 cm
