EXPERT ADVICE FROM AWNING PIONEERS

CHOOSE THE BEST INFLATABLE AWNING FOR YOU AND YOUR VEHICLE

It's important to know the height of the attachment point on your vehicle from the ground to determine which height of awning will best suit your vehicle. For static awnings, this refers to the height from the ground to the awning rail or cassette awning which the awning will be connected to. For drive-away awnings this could also refer to

your vehicle's roof, depending on your preferred fitment method. We offer drive-away and static awnings in a range of heights, designed to fit vehicles with heights of 180 cm up to 310 cm. The diagram below outlines the sizes available for static awnings.

STATIC AWNING HEIGHTS

STATIC AWNINGS

For tourers wanting an awning designed for static use, our best-selling static awnings are easy to set-up and take-down, providing fantastic fitting to the vehicle side and first class accommodation. Utilising the unique AirFrame system, which links individual AirPoles together, Kampa Dometic static awnings can be conveniently inflated from a single point. Twin beading comes as standard (4 mm and 6 mm) and can either be fed through the awning rail attached to your vehicle or threaded through the front channel of a cassette awning.

DRIVE-AWAY AWNINGS

Drive-away awnings offer the ultimate in touring convenience. Quick to set-up and completely free-standing, simply detach your drive-away awning and leave it to reserve your pitch whilst you explore the local area in your vehicle. Available in poled and inflatable AirFrame versions, there's a wide range of awnings available to suit vehicles with attachment heights between 180 cm and 300 cm.

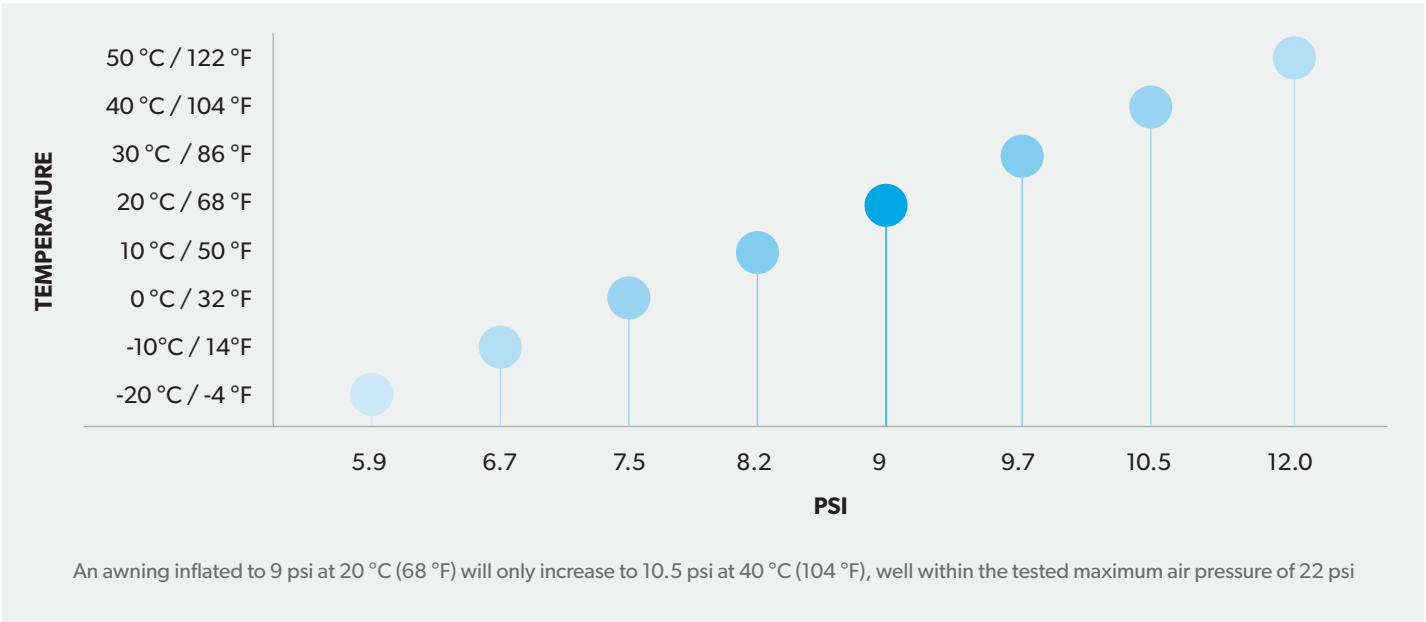

KAMPA DOMETIC AIRFRAME

QUICK AND SECURE – OUR GROUNDBREAKING INNOVATION HAS
REVOLUTIONISED TOURING

The patented AirFrame technology in Kampa Dometic inflatable awnings will transform your touring experience. Two systems have been developed to suit the different awning designs in the range. The Single Point Inflation system sees conventional steel and fibreglass poles replaced with interlinked inflatable AirPoles. This unique Kampa Dometic system enables you to inflate the entire awning from a single point and the AirFrame is always attached to the awning for a quick and easy setup. The second Kampa Dometic system, Multi Point Inflation, utilises separate inflatable AirPoles. This reliable

AirFrame system uses multiple inflation and deflation points for the most straightforward, time-saving awning set-up and take-down. Not only is the AirFrame extremely strong, it can flex in the wind too, meaning you'll never break or bend a pole. Additionally, with no metal or fibreglass poles there's nothing to damage your motorhome, as the AirPoles simply rest against your vehicle with no other attachment needed. Each awning comes with a manual hand pump or for maximum convenience, simply plug in the optional Gale 12 V pump.

AIRFRAME PRESSURE IN RESPONSE TO DIFFERING AIR TEMPERATURES

SINGLE POINT INFLATION

Individual AirPoles are linked together allowing the entire awning to be inflated from a single external inflation point. The entire AirFrame is easily deflated through quick release deflation valves at the base of each leg; as each AirPole is connected there is no need to deflate each AirPole individually. So, as well as being the easiest awnings to set-up, the user-friendly Kampa Dometic awnings are also the easiest to take down.

Deflation valve

For optimal performance inflate to 9 PSI

Inflation valve

AIRFRAME CONSTRUCTION

The AirFrame is incredibly durable, each AirPole is made of a strong TPU inflation tube zipped into a reinforced laminated oxford polyester/PE cover, which is then zipped into a heavy-duty polyester sleeve in the awning. Tested up to 22 psi, the AirFrame system best functions when inflated to 9 psi.

RELIABLE TECHNOLOGY

Kampa Dometic AirPoles are well protected and require no maintenance. Inflatable awnings are considerably lighter, and with no poles to snap, the AirFrame is also far more durable than conventional poles. Suitable for both hot and cold climates, the AirFrame can even handle extreme changes in temperature.

MULTI POINT INFLATION

With ease of use and function in mind, Kampa Dometic have pioneered a range of inflatable awnings specifically designed for motorhomes and camper vans. Multi Point Inflation motorhome and campervan awnings are inflated one AirPole at a time via external inflation points, which double as deflation points.

Internal spreader AirPoles are utilised where necessary to create a strong structure that can withstand the elements and greatly reduce set-up time. We continually look to improve the design and function of AirFrame awnings with enhancements made year-on-year.

For optimal
performance
inflate to
7-8 PSI

Each AirPole is made of a strong TPU inflation tube that is zipped into a tough reinforced polyester cover. This is then zipped into a heavy-duty polyester sleeve in the awning. The result is an extremely well protected, durable AirFrame which requires no maintenance.

AWNING KEY FEATURES

INNOVATIVE FEATURES TO ENHANCE YOUR TOURING EXPERIENCE

AIRFRAME™

Focussing on ease of use and function, AirFrame awnings are extremely durable, maintenance-free and strong.

QUICKPITCH™ GUYING SYSTEM

Heavy-duty straps can be pegged out in seconds. Peg the bottom strap taut and adjust the top buckle to apply tension.

DUAL-PITCH™ ROOF SYSTEM

Effectively deflect wind and shed rain water efficiently to prevent puddling on the roof and enhance performance.

SABRELINK™ READY

Attach up to three lights on the front and centre AirPoles. Switch the lights on/off and adjust the brightness remotely. Also suits poled awnings.

LIMPET™ READY

Pre-punched holes ready to attach the rear wall of the awning to the vehicle using Limpet Fix technology.

CLIMATE CONTROL

High and low level vents create airflow to ventilate your tent. Ventilation helps prevent condensation and improves comfort.

ZIPPED BLINDS

Zipped window blinds with easy-store pockets provide privacy when you need it.

SLEEP-TITE DARKENED BEDROOMS

Inner tents use dark materials to help block out sunlight for a good night's sleep.

WIDER BEDROOMS

On average, Kampa Dometic bedrooms are the widest available, ensuring a comfortable night's sleep.

WARDROBE POLE READY

Simply clip in to the left or right hand inner tents and unpack your clothes.

AWNING MATERIALS

HIGH QUALITY FABRICS TESTED FOR DURABILITY

WATERPROOF

Tested to 200L/m² per hour to ensure that you are kept dry.

WEATHERSHIELD™ ALL-SEASON

Ultra-rugged and UV resistant All-Season material, perfect for touring in warmer climates and for use on a seasonal pitch. The fully breathable fabric is constructed to handle extremes of weather and has been tested in the wettest regions of Europe and the sunniest parts of Australia to ensure it never lets you down.

WEATHERSHIELD™ PRO

The iconic Kampa Dometic fabric used extensively throughout the awning range has proven quality in diverse environments. With the look and feel of a traditional fabric, but weighing far less, Weathershield™ Pro continues to be the definitive choice for tourers the world over.

WEATHERSHIELD™ PVC

Constructed with 400g/m² PVC, this super tough awning material is waterproof, long-lasting and easy to clean. Developed by Kampa Dometic for winter touring, Weathershield™ PVC is rated to -20 °C, more than a match for even the most extreme snowy conditions.

WEATHERSHIELD™ CLASSIC

All the protection of polyester materials with superior comfort. High quality Weathershield™ Classic polycotton material allows the awning to breathe, reducing condensation and helping to regulate the interior temperature on hot days.

WEATHERSHIELD™ 150D

Extremely light and easy to handle, Weathershield™ 150D promises super-fast set-up and take-down every time. Highly durable and weather-resistant too, this lightweight material offers great value with no compromises.

WEATHERSHIELD™ 68D

Super lightweight Weathershield™ 68D offers the fastest set-up, take-down, and the smallest awning pack sizes. Highly weather-resistant, this easy to handle polyester offers exceptional value and advanced protection against UV degradation.

An Ultraviolet Protection Factor (UPF) denotes how much solar ultraviolet radiation is reduced when passing through fabric. Kampa Dometic awning material allows only 1/50th of ultraviolet rays to pass through, ensuring you're protected and kept cool.

ZIP-OUT FRONT PANELS

Front panels can be zipped out to reduce weight and to open the awning up veranda style.

MESH WINDOW

A large secondary mesh panel behind the right-hand side window provides welcome shade in hot weather.

INTERNAL RETURN

Fold-out rear bumper pads create a tight seal to the motorhome side. Designed for use when attaching to a cassette awning.

QUICKPITCH™ GUYING SYSTEM

Heavy-duty straps can be pegged out in seconds. Peg the bottom strap taut and adjust the top buckle to apply tension.

STORM STRAPS

Included as standard with this awning, storm straps add stability and improve performance in adverse weather conditions.

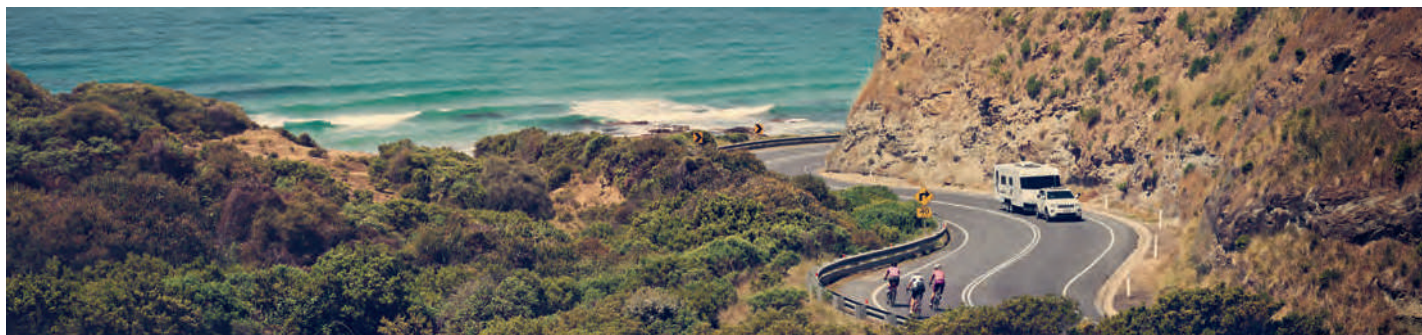

SINGLE POINT INFLATION

Single Point Inflation AirFrame awnings inflate entirely from just one external inflation point.

WEATHERSHIELD™ ALL-SEASON

Ultra-rugged and UV resistant All-Season material, perfect for touring in warmer climates and for use on a seasonal pitch. The fully breathable fabric is constructed to handle extremes of weather and has been tested in the wettest regions of Europe and the sunniest parts of Australia to ensure it never lets you down.

GRANDE AIR PRO

DOUBLE THE LIVEABLE SPACE OF YOUR PITCH

QuickPitch™ webbing straps, roll-to-side front panels, Weathershield™ Pro fabric and Single Point Inflation are just some of the superb features that make the Grande AIR Pro the perfect complement to your motor-

home. Its generous 3 m depth and Dual-Pitch™ roof creates a wonderful sense of space, making it ideal for long luxurious breaks.

QUICKPITCH™ GUYING SYSTEM

Heavy-duty straps can be pegged out in seconds. Peg the bottom strap taut and adjust the top buckle to apply tension.

DUAL-PITCH™ ROOF SYSTEM

Increases headroom, ensures effective wind deflection and efficiently sheds rain water.

SINGLE POINT INFLATION

Conveniently inflate the entire AirFrame from just one external inflation point.

WINTER AIR PVC 260

NOW THERE'S NO OFF-SEASON

The world's first inflatable winter awning, Winter AIR PVC comes complete with snow support poles, a double mud wall, storm straps and tarzan pegs as standard. Its super tough Weathershield™ PVC

material ensures this awning stands up to the most extreme snowy conditions. While the new triple beading means this awning is equally suited to both motorhomes and caravans.

PREPARED FOR ANYTHING

The Winter AIR PVC has been designed from top to bottom to support your winter adventures. In anticipation of the demanding weather conditions you may face, the world's first purpose built inflatable winter awning has everything you need to thrive in the most challenging of conditions.

Included with the awning as standard:

- 2 x Rear upright poles
- 2 x Snow support poles
- Roof lining
- Storm straps
- Draught skirt
- Downdraught hand pump
- Tarzan pegs

SINGLE POINT INFLATION

Conveniently inflate the entire AirFrame from just one external inflation point.

APEX VENTILATION

Weather protected apex ventilation improves comfort by allowing warm air to escape, increasing air circulation and reducing condensation inside the awning.

TRIPLE BEADING

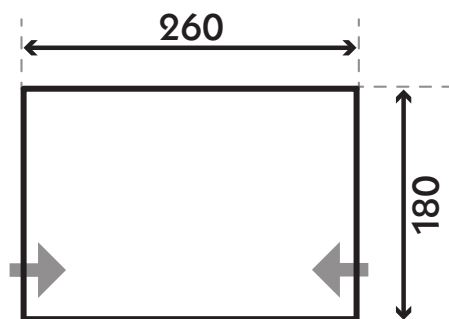

Features 4 mm, 6 mm & 7 mm beading as standard, allowing secure fitment to both caravan awning rails and motorhome cassette awnings.

DRIVE AWN

-AWAY INGS

DRIVE-AWAY ATTACHMENT OPTIONS

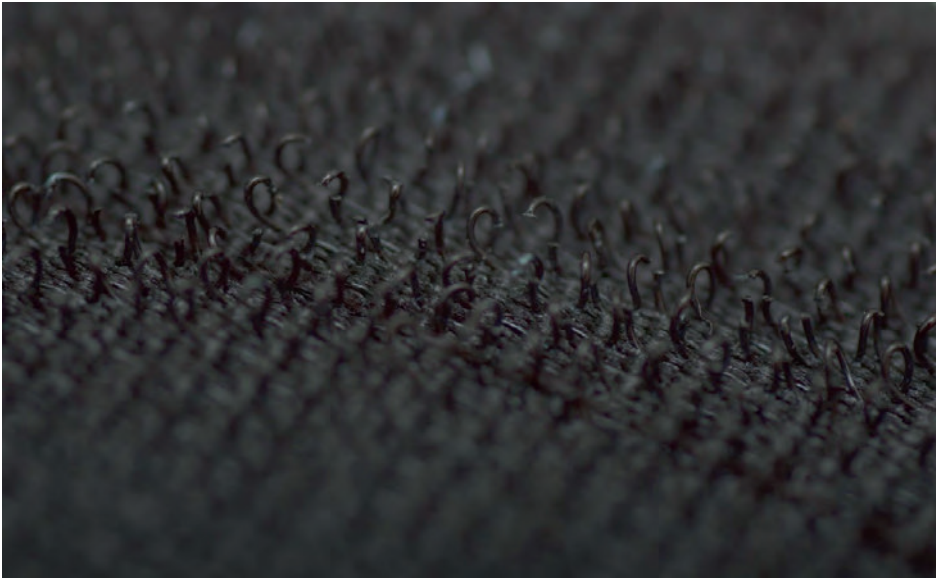

Kampa Dometic awnings are available in a range of heights, designed to fit vehicles from 180 to 300 cm in height. Specifically designed for secure attach to most motorhomes and campervans, maximise your awnings performance and your enjoyment of it.

So which best suits you and your van? Let's look at the options, starting with the guy line: Guy line, velcro loops and beading attachment methods are explained below.

GUY LINE

The quickest method. Throw the guy lines, attached to the top corners of the tunnel, over the vehicle and either peg down on the other side or tie to the wheels. To drive-away, simply untie/unpeg and throw them back over.

VELCRO LOOPS

Velcro straps are quick to attach to your vehicle's roof rails, if available. Connected from the top edge of the tunnel to the rail, simply release the hoops and drive away.

DRIVE-AWAY KITS

Drive-away kits offer a secure way to attach your awning to your vehicle. Simply connect the figure-of-8 strip to the keder along one edge before attaching the pre-sewn awning beading along the other. To drive away, slide the figure-of-8 out of position and leave the awning free-standing on your pitch.

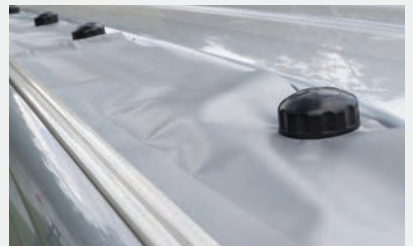

TWIN DRIVE-AWAY KIT KEDER

Connect to the front channel of cassette awnings or a pre-installed awning rail. 4 mm and 6 mm twin keder drive-away kit. Available in 3 m and 4 m lengths.

MAGNETIC DRIVE-AWAY KIT

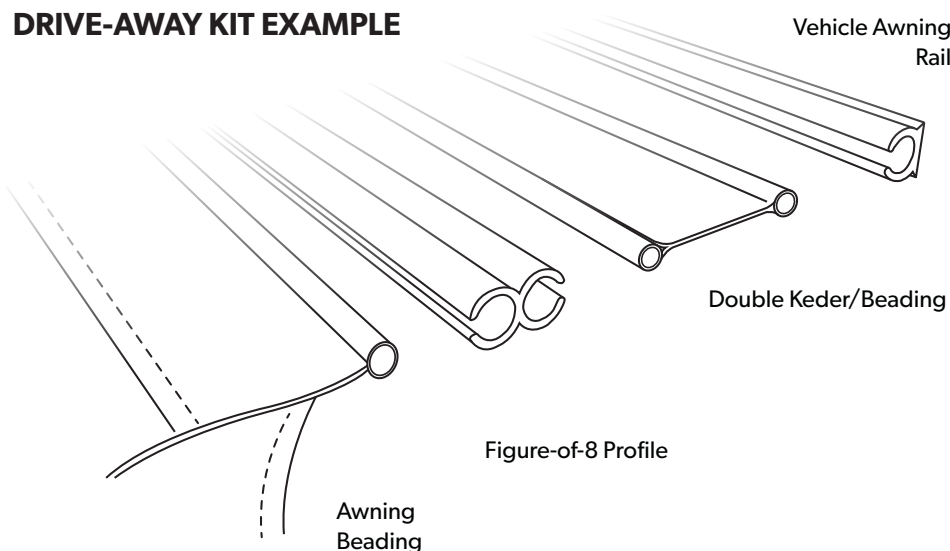

6 mm keder to magnetic system. Guying loops included (guy lines not included). 3 m length.

LIMPET™ SUCTION DRIVE-AWAY KIT

6 mm keder to Limpet™ Fix System. Supplied with six Limpet's. 3 m length.

DRIVE-AWAY KIT EXAMPLE

RALLY AIR PRO 240 T/G

INFLATABLE DRIVE-AWAY TAILGATE AWNING

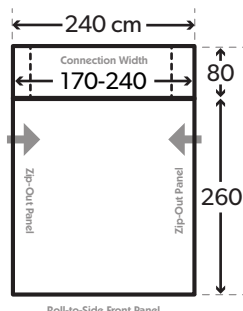

The new Rally Air Pro 240 T/G has been purpose built to fit onto panel van conversions with a rear barn door, simply open doors and let the living area flow into the awning. This new model's Dual-Pitch™

roof system offers masses of head room and allows you to leave it on site whilst you explore the local area.

For full technical data see p. 60

Fitting Heights
220 - 275 cm

ADJUSTABLE AWNING TUNNEL

Adjustable height rear tunnel. Webbing straps take up material slack to ensure vehicle fitting.

SINGLE POINT INFLATION

Conveniently inflate the entire AirFrame from just one external inflation point.

QUICKPITCH™ GUYING SYSTEM

Heavy-duty straps can be pegged out in seconds. Peg the bottom strap taut and adjust the top buckle to apply tension.

MESH PANEL

A large mesh panel behind the right-hand side window provides relief in hot weather.

APEX VENTILATION

Weather protected apex ventilation allows warm air to escape, increasing air circulation and reducing condensation inside the awning.

ROLL-TO-SIDE FRONT PANEL

The front panels can be rolled to the side opening the front up, or alternatively zipped halfway down to let air in without compromising security.

WEATHERSHIELD™ PRO

The iconic Kampa Dometic fabric used extensively throughout the awning range has proven quality in diverse environments. With the look and feel of a traditional fabric, but weighing significantly less, WeatherShield™ Pro continues to be the definitive choice for tourers the world over.

RALLY AIR D/A

THE ULTIMATE DRIVE-AWAY AWNING

Designed to suit a wide range of motorhomes, Rally AIR D/A awnings allows you to leave your awning on site while you explore the local area. The Single Point Inflation AirFrame technology ensures a fast

set-up with minimum fuss. Simply connect the awning tunnel to your vehicle by throwing the attached webbing straps over the motorhome, or with the use of a drive-away kit.

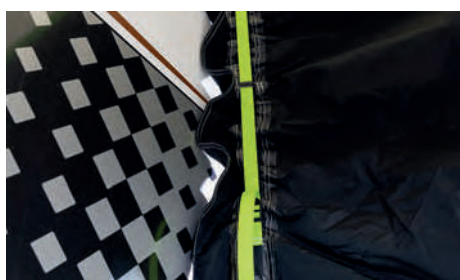

NEW

RALLY AIR ALL-SEASON 330 D/A MH2013

Ref. No. 9120000200

The new Weathershield™ All-Season version of the Rally AIR 330 Drive-Away combines a rugged seasonal pitch material with the easy to set up Single Point Inflation AirFrame. Zip-out front and side panels to use the awning veranda style and reduce the weight too.

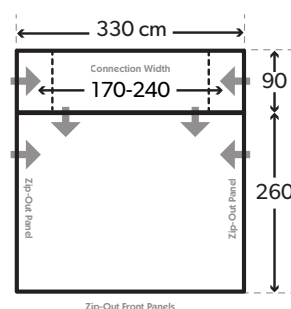

ADJUSTABLE AWNING TUNNEL

Adjustable height rear tunnel to suit a wide range of vehicles. Webbing straps take up material slack to ensure a tight fit to your vehicle.

SINGLE POINT INFLATION

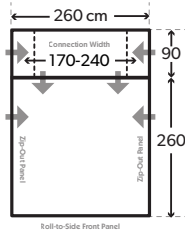

Conveniently inflate the entire AirFrame from just one external inflation point.

TAILGATER

UPGRADE YOUR ADVENTURE

A universal fit awning for vehicles with a rear tailgate such as SUV's, MPV's, crossovers, large estate cars and pick-up trucks fitted with a hardtop. Weathershield™ 68D material ensures lasting durability and lightweight handling. Simply clip-in the optional two-berth inner tent to accommodate guests. Easy to attach and disconnect, conveniently zip close the Tailgater while you go out and explore. Fibreglass and AirFrame models available.

Fitting Height

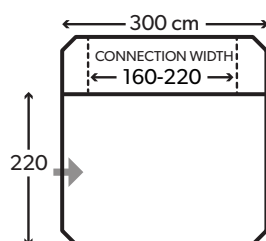

160 - 210 cm

Fitting Width

160 - 220 cm

TAILGATER AIR CE7234

Ref. No. 9120000138

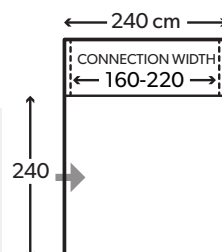

TAILGATER CE7232

Ref. No. 9120000139

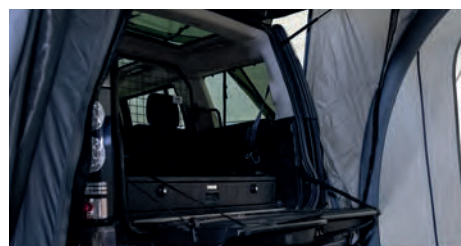

DYNAFLEX FIBREGLASS POLES

Tough, high quality fibreglass poles combine strength with flexibility.

For full technical data see p. 65

ADJUSTABLE AWNING TUNNEL

Adjust the height and width of the connecting tunnel. Webbing straps take up material slack to ensure secure fitting.

MESH PANEL

A large mesh panel behind the side window provides relief in hot weather.

WET WEATHER ENTRANCE

Sheltered access to the awning preventing rain running in when you unzip the door.

ACCESSORIES

STORE PVC

THE WORLD'S FIRST INFLATABLE STORAGE TENT

The generous dimensions of the Kampa Dometic Store PVC makes it ideal for keeping your awning clear of furniture and bikes, or for creating the ultimate camping kitchen. Its durable Weathershield™ PVC construction allows you to explore off-site with the confidence your gear is safe and well protected from the elements. For extra security, up to four optional storm tie-down straps can be fitted. Available with an aluminium or inflatable AirFrame.

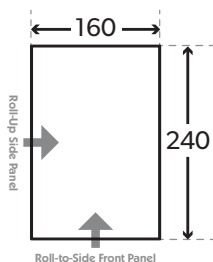

STORE AIR PVC CT9037

Ref. No. 9120000432

For full technical data see p. 66

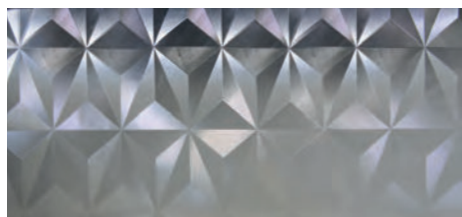

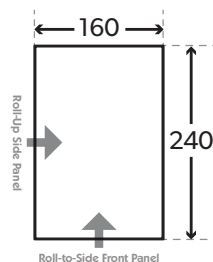

STORE PVC CT9036

Ref. No. 9120000435

DYNALITE ALUMINIUM POLES

Tough, high quality aluminium poles are both lightweight and strong.

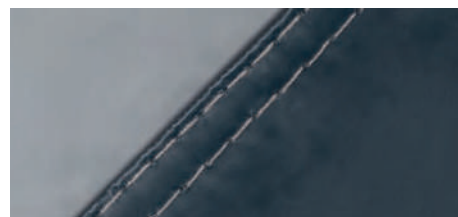

PRIVACY WINDOW

Diffusing the sun's rays to ensure the Store retains a light, airy feel without overheating and compromising privacy.

ROLL-UP SIDE PANELS

Allows easy access to larger items, such as furniture and bikes.

WEATHERSHIELD™ PVC

400g/m² Weathershield™ PVC is tough, waterproof and easy to clean.

AIR BREAK

THE WORLD'S FIRST INFLATABLE WINDBREAK

Never has a windbreak been so easy to set-up. Simply peg and pump to enjoy the AIR Break's free-standing protection or connect it to the front of Kampa Dometic awnings to create a fully enclosed area – great for keeping dogs in. Utilising a unique AirFrame system with

easy Single Point Inflation, the AIR Break remains sturdy yet flexible in the wind. Available in Weathershield™ Pro fabric and new for 2020, Weathershield™ All-Season material, this windbreak complements your awning perfectly.

PRO WINDBREAK

VITAL PROTECTION FROM THE WIND

Quick to set-up and supported with adjustable support bars, the Pro Windbreak is the perfect addition to your awning. The full aluminium frame is lightweight and corrosion-resistant. Connect multiple Pro

Windbreaks together using figure-of-8 strips (AC0325) to create a larger protected area, and enclose the area with zipped access using the Pro Windbreak Door – ideal for pets.
